

DUAL ACTION **PLUS** DOCK & DUMPSTER

DUMPSTERS: UNSIGHTLY. UNSANITARY. UNSAFE. AND SIMPLY SMELLY.

One of the many challenges for facility managers is maintaining dumpsters, trash compactors, composting bins and the surrounding dock areas. Foul odors, pests and the unsightly appearance create an unpleasant work environment and are certainly customer turn-offs. Additionally, the organic dumpster sludge makes docks and indoor floor areas slippery and is a health hazard. This sludge also seeps into surface area pores, causing decay and potentially expensive repairs. Meanwhile, existing cleaning practices push this greasy matter into drains, causing clogs and overflows.

TRADITIONAL CLEANING PRACTICES: EXPENSIVE. TIME-CONSUMING. TOXIC.

Current maintenance practices are costly, inefficient and often harmful to the environment. Unfortunately, these practices typically do not permanently eliminate the millions of unhealthy, odor producing bacteria on the dumpster or compactor walls. As a result, the decay cycle is kick-started again and again as soon as new rubbish is added, thereby rendering frequent pick-up schedules ineffective as an odor mitigation tool. Combined with regular service charges and transfer fees, the cost for compliance is substantial. And the impact on the environment is significant as contaminated runoff often enters storm drains and ultimately finds its way into our nation's waterways and bays causing further ecological damage.

MOTHER EARTH ECO-REMEDICATION DOCK & DUMPSTER: LOOKS IMPROVED. NO MORE ODORS. MONEY SAVED.

Mother Earth Eco-Remediation's 100% natural DUAL ACTION **PLUS** Dock & Dumpster delivers heavy-duty cleaning and degreasing of garbage dumpsters, trash compactors, composting and recycling bins, landfills/transfer stations and surrounding dock areas.

The cleaning treatment provides the most cost-effective solution for dumpster maintenance as it eliminates numerous hours of manual scrubbing and dramatically reduces maintenance material cost by tackling multiple problems at once.

Rapid Odor Relief

Improve visual appearance

Extend the Longevity of Dock Surfaces by Preventing Grease-Causing Degradation

Deep Cleaning of Dock Grease & Food Soil Stains & Spills

One product does it all. Simply spray the ready-to-use Mother Earth Eco-Remediation product with a hydro-foamer onto the dumpster and dock areas.

Cost Effective. Extreme Power. Green.

At Mother Earth Eco-Remediation's we are committed to cost-effectiveness. It's a key metric we use in evaluating the performance of all of our treatments and the driving force behind Mother Earth eco-Remediation's proprietary formulation technology, called BIOTRATION. At the core of the cleaning action is our exclusive microbial cleaning blend featuring wide spectrum waste removal and a tremendous cleaning ability fueled by its 1 Trillion CFU (Colony Forming Units) per gallon concentration. The safe and voracious microorganisms digest organic grease and sludge in, on and around dumpsters leaving only water and carbon dioxide behind. They systematically out-compete and literally starve the odor-causing, unhealthy bacteria and prevent new sludge build-ups from occurring. Their rapid replication and colonization rate coupled with powerful earth-friendly detergents, render the BIOTRATE formulas cleaning power unmatched in any category.

EXTENDING THE CLEANING POWER INTO DOCK DRAINS

When the Dock & Dumpster product enters floor drains, the BIOTRATE microbes continue eating accumulated fats, oils, and grease and other organic waste thereby helping avoid inconvenient and costly back-ups, messy overflows, unpleasant odors, business disruptions and unsanitary, bad-looking floor drains.

TRIED. TESTED. PROVEN.

Numerous field trials and customer case studies continue to demonstrate the extreme cleaning efficacy of BIOTRATE formulations and their ability to outperform competing green and traditional cleaning products. All Mother Earth Eco-Remediation products are subject to stringent quality controls, helping guarantee top notch product performance.

PRODUCT DESCRIPTION

Mother Earth Eco-Remediation's Dual Action **PLUS** Dock & Dumpster, featuring the exclusive BIOTRATE formula is:

- ❖ A heavy-duty, industrial-grade cleaner
- ❖ 100% Green & 100% Biodegradable
- ❖ Safe for employees & the environment
- ❖ Non-toxic, Non-caustic
- ❖ Non-flammable
- ❖ Water-based
- ❖ A concentrated, ready-to-use (RTU) formula

PRODUCT FEATURES

- ❖ Quick & easy application
- ❖ No scrubbing & rinsing
- ❖ Rapid odor relief
- ❖ Deep cleaning
- ❖ Pest food source reduction
- ❖ Minimizes water required for cleaning

PRODUCT SPECIFICATIONS

- ❖ Fragrance: None added
- ❖ pH: 7.5
- ❖ Appearance: Green liquid
- ❖ Foaming: Medium
- ❖ Specific Gravity: ~1
- ❖ Viscosity: Thin

PRODUCT BENEFITS

- ❖ Controls odor
- ❖ Prevents slippery & unsafe docks
- ❖ Improves worker safety
- ❖ Enhances visual appearance of waste areas
- ❖ Extends dock longevity
- ❖ Saves money: one product does it all
- ❖ Conserves water
- ❖ Replaces hazardous, toxic chemical cleaning products
- ❖ Supports green initiatives and LEED certification program

PRODUCT APPLICATION

Mother Earth Eco-Remediation's Dual Action **PLUS** Dock & Dumpster is designed for ease of use, versatility and superior cleaning in and around garbage dumpsters, trash compactors, recycling and composting bins, landfills and transfer stations, as well as for treating animal waste, urine and decomposing organic debris:

- ❖ Ready-to-use formula
- ❖ Apply undiluted with:
 - Hydro-foamer: 1:12 dilution ratio
 - Generic hydro-foamer: dilution ratio between 1:8 and 1:12
- ❖ Apply to interior and exterior of dumpsters and on surrounding areas
- ❖ Use every-other day or as necessary
- ❖ No rinsing required
