

# INDUSTRIAL DRAIN CLEANER

Mother Earth Eco-Remediation Industrial Drain Cleaner naturally breaks down fats, oils and grease in the drain lines and grease traps of restaurants and food processing facilities. It is extremely effective and non-toxic and non-caustic so it will not harm drain lines. It benefits the environment.

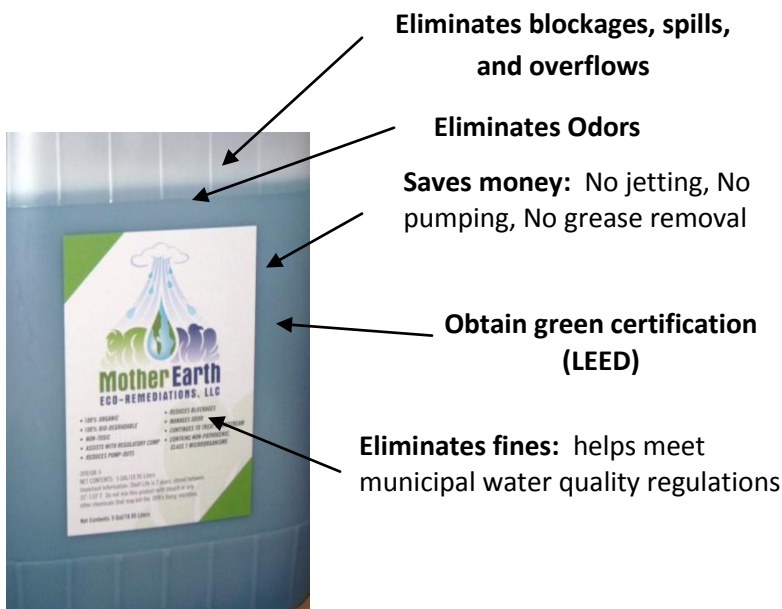

Our product is based on a bacterial formula that colonizes in the pipes and grease traps and literally eats the grease – leaving behind only water and carbon-dioxide.

**Peace of Mind:** Mother Earth Eco-Remediation Solution helps provide a great customer experience! It eliminates worries about restaurant odors or the possibility of untimely trap and drain related backups.

Mother Earth Eco-Remediation Solution simplifies your grease management task because it is automatically fed into your grease trap each evening through a computerized metering unit. Doses are customized to your operation (type of cuisine, # of meals served, etc.).

**Mother Earth Eco-Remediation Solution helps provide a great customer experience! It eliminates worries about grease and drain pipe related odors and back-ups.**

- **Powerful:** strongest product on the market
- **Safe:** All natural formula is non-toxic and environmentally beneficial
- **Lower Cost:** Reduces grease trap pumping by 60-70%, eliminates jetting, and reduces restaurant grease management costs by 50%
- **Regulatory compliant:** Prevents F.O.G (fat, oil & grease) from entering municipal waste stream
- **Blue Tech:** Creates a biological barrier of billions of bacterial colonies on the inner surface of pipes to prevent grease buildup

**Eliminates blockages, spills, and overflows**

**Eliminates Odors**

**Saves money:** No jetting, No pumping, No grease removal

**Obtain green certification (LEED)**

**Eliminates fines:** helps meet municipal water quality regulations
